Tutorial - Instalação do Drawer Navigation

No projeto, instalar as seguintes dependências:

npm install @react-navigation/native react-native-screens react-native-safe-area-context @react-navigation/drawer react-native-gesture-handler@2.1.1 react-native-reanimated

No MainActivity, adicionar:

```
@Override

protected void onCreate(Bundle savedInstanceState) {

  super.onCreate(null);

}
```

e no topo do MainActivity;

```
import android.os.Bundle;
```

No App.js, acrescentar ao topo:

```
import 'react-native-gesture-handler';
```

Em babel.config.js, acrescentar:

```
module.exports = {

  presets: ['module:metro-react-native-babel-preset'],

  plugins: ['react-native-reanimated/plugin'],

  };
```

Em android/app/build.gradle, ativar o Hermes:

```
project.ext.react = [

  enableHermes: true  // <- here | clean and rebuild if changing

]
```

Em MainApplication.java, acrescentar:

```
  import com.facebook.react.bridge.JSIModulePackage; // <- add

  import com.swmansion.reanimated.ReanimatedJSIModulePackage; // <- add

  ...

  private final ReactNativeHost mReactNativeHost = new ReactNativeHost(this) {
```

...

```java
    @Override
    protected String getJSMainModuleName() {
      return "index";
    }

    @Override
    protected JSIModulePackage getJSIModulePackage() {
      return new ReanimatedJSIModulePackage(); // <- add
    }
  };
```

Após todos esses passos, resetar o server com:

npx react-native start --reset-cache

E após:

npm run android
